## **plasticizer admixture for concrete**

The performance comparison between plasticizer admixture for concrete and similar products at home and abroad shows that plasticizer admixture for concrete has reached the international advanced level in terms of technical performance index and cost performance.

It is set to reduce water, protect slump, strengthen, prevent shrinkage and environmental protection is equal to a series of excellent properties of water reducer, can completely solve the high strength, high performance concrete viscosity, construction performance is not good weakness, is used for the preparation of high strength, high performance concrete ideal admixture.

It can be compounded with various admixtures and become multifunctional admixtures, such as pumping agent, early strength agent, impermeable water-proofing agent, retarder and so on.

**Shandong Zhuoxing Chemical Co., Ltd.**  
**Zibo Zhuoxing Enterprises Co., Ltd.**

plasticizer admixture for concrete breaks the routine in the production process, adopts the thermal synthesis process, greatly reduces the production cost in energy consumption, does not add isolation agent, the product produced is of higher purity, solid content is controlled at about 98%.

In terms of product performance, high purity products have the characteristics of low dosage, high slump performance of effective ingredients, and further reduce customer cost.
